Setting the stage: Signposts for change and major opportunity….

1. **Consumer dissatisfaction with the healthcare status quo will continue to grow** (i.e., consumer awareness and accountability rises with growth defined contribution, public and private exchanges, prevalence of high deductible and limited network plans)

2. **Consumer power and voice is on the rise** (i.e., reset expectations bar with greater consumer choice and web/social/mobile, crowdsourced data and transparency tools spotlighting value; population health managers benefit from active consumer engagement)

3. **Tidal wave of tech and retail-based innovation starts to address large unmet consumer needs** (e.g., simplification, transparency, convenience, decision tools, VBB)

4. **The B2C market will grow with shifting societal norms towards healthy living and significant leaps in engagement technology**

5. **Incumbents are getting a wake-up call with a competitive race to ‘own the consumer’ with non traditional players** (e.g., Walmart) making big bets and driving shifts in existing businesses
Is it real? Some scenarios to consider…

 Providers
What if Walmart finally enters and captures a significant portion of primary care?

 Payers
What if GEICO or Progressive started selling health insurance?

 Consumer Health
What if Amazon creates a consumer health portal, that offers insurance plus consumer tech offerings?

• What would be the impact?
• If not this scenario, what keeps you up at night?
The Healthcare 2.0 marketplace will have two macro innovations

- New generation of players **redefine care delivery and patient experience** around total value
- Leads to the creation of **new population segment-based care** models & entire ecosystems
- **Redistributes revenues and profits** amongst incumbent and new players

- As consumers shop for themselves their **expectations rise**
- Seek out **novel health & wellness products and services** that are: intuitive, transparent, personalize, and technology-enabled
- Leads to **changes to all aspects of the consumer experience** - shopping, products, networks, engagement models, and incentives
We believe a consumer-centric, value based healthcare marketplace can produce truly transformative results…

20% total cost reduction
5% trend reduction
25% consumer value improvement
$7 TN of cost reduction over ten years
$1 TN of value rotation
1,000X the diffusion rate
Patient-centered population health: Pyramid Value Redistribution

By preventing expensive hospitalizations among “top of pyramid” patients, we can free up savings to invest in preventative care for those “at-risk”

PATIENT POPULATIONS

COST BREAKDOWN

5%
Polychronic

45%
ER visits, overutilization, high care variation, noncompliance

20%
At-risk for major procedures (e.g. cardiology, oncology)

35%
Infections, complications, rehospitalizations

75%
Healthy, minor health issues

20%

The existing healthcare system has many gaps to fill to deliver Healthcare 2.0 - this creates many opportunities for non-incumbents
Companies must focus on the whole consumer—not just their benefit structure and health status

Current Health System
Patient / Member-Centric

Future Health System
Consumer-Centric

Focus on meeting a single, health-related, top-of-mind concern for customers

Focus on addressing a range of potential issues for consumers, considering how each of the issues is interrelated and how it can have an impact on the others
True consumer-centered companies work relentlessly to delight consumers—raising expectations and enabling consumer buying power to shape the market.

Reframed consumer health market

Increasing consumer engagement

New rules
- Always available
- Completely personalized
- Crowd sourced
- Community based
- Smart phone delivered
- Simple and intuitive
- Situation-adaptive

More holistic view of consumer needs

- Physical
- Social
- Mobile/web
- Physical

Scope of engagement

Fitness and nutrition
Wellness
Sick care
Social
Full integration with consumer’s life
The health and wellness market will be redrawn as a consumer space – creating new market structures and a new generation of business designs.

Who Will Emerge? Who Will Win?

At stake is ~$1T in value…

* Potential archetype of a consumer value market maker that could emerge; non asterisks are already flirting with this space…
Do we really have the consumer in focus? How can we own or drive the consumer relationship and experience? How do we build consumer credibility?

1. Scope and scale of consumer engagement?

2. Value and power of the integrated consumer value chain – 1 + 1 = ?

3. Likely value chain organizers – what will it take – who will be trusted?

4. Dimensions of competition – anywhere, anytime, personalized?

5. Role of health status and benefits coverage in shaping value chain leadership?
Are we moving fast enough?

The leader advantage is expanding, fueled by new technology, capital markets, and hard earned lessons.

Today-player questions
• Is the cost of inaction on the rise?
• Is there an inflection point where we can’t catch up to the leaders of the pack?
• If one of these models entered our markets, could we respond?
