The Opioid Crisis: Protecting Members from Fraud, Waste and Abuse

March 19, 2018
Horizon BCBSNJ at a Glance

- Horizon BCBSNJ, the state’s oldest and largest health insurer, is a tax-paying, not-for-profit health service corporation, providing a wide array of medical, dental, vision and pharmaceutical insurance products and services.
- Currently serve more than 3.8 million members.
- Offices in Newark, Wall, Mount Laurel, West Trenton and Hopewell.
- Over 5,500 employees.
Scope of the Opioid Crisis in NJ

Overview

New Jersey is experiencing an unprecedented number of opioid-related deaths with certain geographies as the key drivers.

Total deaths from drug overdose in NJ

Key takeaways

- **Top five counties** with highest number of drug overdose deaths are Atlantic, Camden, Essex, Monmouth and Ocean
- From 2014 to 2016, New Jersey emergency officials have deployed naloxone ("Narcan") **more than 18,000 times**
- More than **six deaths a day** in 2016

Key Opportunity for Behavioral Health Delivery in NJ

BH delivery in NJ is fragmented with a lack of access and availability of services.

- High OON/OOS Utilization
- Lack of Innovation and Integration in Care Delivery
- Fragmented System
- Lack of Value-Based Models
- Provider Readiness
- Fraud and Abuse
- Stigma
Demand for Care Gives Rise to Predatory and Fraudulent Practices

- According the Substance Use and Mental Health Services Agency (SAMHSA), over two million people nationally abuse opioids.
- Treatment costs for substance use disorders continue to rise exponentially.
- Loose regulation and licensing practices at the state and federal levels allow unethical actors to engage in multi-million dollar health care fraud, receive kickbacks or provide care from non-licensed individuals.
- Often unscrupulous organizations use a multitude of practices to lure insured individuals to complicit facilities, usually far from family or friends.
- Marketers/brokers promise insurance; coverage obtained fraudulently using ACA “special enrollment provisions”.
- Private Equity investment in SUD businesses nationwide.
- Facility accreditation (JCAHO/CARF) that is not tied to outcomes.

Obstacles Faced in NJ and Nationwide

- Active Facebook bounties for referrals
- Patient brokering
- Large cash Medication Assisted Treatment (MAT) business
- Billboards in NJ advertising FL treatment organizations
- Facilities typically are out of network
- Falsified contact information prevents communication with members
- Overutilization of urine drug screening
- Sober living homes/recovery housing – minimal requirements to operate; inadequate oversight/review

Photo Source: hoganforensics.com
Illegitimate Enrollment Tactics

- Brokers use fraudulent qualifying events (i.e., permanent move) under Special Enrollment Period
- Insurance plan targeted for maximum profit
- Premiums paid by third parties
- Facility claims filed within days of policy effective date
Excessive/Unnecessary Urine Drug Testing

- Abuse occurs when a facility sends every sample out for confirmation regardless of screening result, several times weekly, not waiting for one result before ordering another.
- No clinical indication or utility – simply revenue generating.
- $1200 - $12,000 per test; totaling more than $150,000 per patient for 90-day program.

Horizon BCBSNJ’s experience in 2016:
- Total UDT spend – $103M
- Florida UDT spend – $32M
- Florida SUD Treatment spend – $37M
The Patient Victim

- “Treatment” centers often not as advertised/promised.
- False advertising to illustrate in-network status when in fact there are no existing relationships.
- Desperate individuals and family members easily manipulated; don’t question obvious falsehoods.
- When claims denied, members kicked out with no transition services; often end up in homeless centers or on the street.
- Ongoing concerns over continuing treatment, ability to obtain insurance, unpaid bills.

BCBSA’s Recommendations

- Align 42 CFR Part 2 requirements with HIPAA.
- Require federal, state and local governments to subject all addiction treatment facilities (including sober living/recovery homes) and programs to the same mandatory and rigorous licensing and oversight as other health care facilities.
- Prohibit third party payment of premiums.
- Expand use of “lock-in” initiatives for at-risk beneficiaries to all programs that receive government funding, i.e. Medicare, Medicaid, FEHBP, individual market.
- Provide states incentives for adoption of policies requiring health systems’ and prescribers to use e-prescribing for controlled substances.
